ABOUT THE COMPANY

At Ultra Consulting Group, we specialise in providing comprehensive fire safety design and consultancy services tailored to meet the highest standards of safety and compliance. With an unwavering commitment to excellence, we deliver innovative and practical solutions across various fire safety systems, ensuring our clients have the support they need to protect lives and property.

Guided by a deep understanding of the Building Code of Australia (BCA) and industry best practices, we collaborate with builders, contractors, and stakeholders to ensure seamless integration of fire protection systems in projects of all scales. Whether you're designing new installations, preparing tender documentation, or conducting peer reviews, we are your trusted partner in fire safety.

Director Profile

Aaron Mugica | *Director*

Aaron Mugica is a highly qualified fire safety design and consultancy professional with over a decade of experience. Holding diplomas in Mechanical Engineering and Fire Systems Design, he is accredited as a NSW Fair Trading Design Practitioner (DEP0003831) and Principal Design Practitioner (PDP0001279).

Aaron specialises in fire sprinkler systems (L4) and advanced fire hydrant and hose reel systems (L3), with ongoing accreditation in fire alarms and detection (L3). His expertise ensures tailored, compliant, and innovative fire protection solutions for every project.

Core Qualifications

Diplomas:

- Diploma in Mechanical Engineering – TAFE NSW
- CPC50520 Diploma in Fire Systems Design

Licenses and Accreditations:

- NSW Fair Trading Design Practitioner (DEP0003831)
- NSW Fair Trading Principal Design Practitioner (PDP0001279)
- FPAA Fire Safety Assessor Registry (F044120D)

Specialist Areas:

- Fire Sprinkler Systems (L4)
- Fire Hydrant and Hose Reel Systems (L3)
- In-progress: Fire Alarms and Detection (L3)

SERVICES AND EXPERTISE

Our expertise encompasses a wide range of services designed to deliver compliant and innovative fire protection solutions. These include:

- **Design and Consultancy** for fire sprinkler systems, hydrant and hose reel systems, and alarm and detection systems.
- Preparation of **tender documentation**, including detailed plans and specification notes for fire sprinkler, hydrant, hose reel, and alarm systems.
- Creation of **DA/CDC/CC drawings and documentation** to meet regulatory requirements.
- **Consultation and design advice** for dangerous and hazardous goods.
- Assistance with **cost planning** for fire safety systems.
- Preparation of **dilapidation and inspection reports** for brownfield sites.
- **Peer review** of documentation and site inspection reports in collaboration with builders and contractors.
- Support with **estate planning** and fire protection systems design.
- **Endorsement** of plans, specifications, and exemptions from compliance with the Building Code of Australia (BCA) for relevant fire safety systems.

INSURANCE, COMPLIANCE AND ACCREDITATIONS

Insurance Coverage

To ensure peace of mind for our clients, we maintain comprehensive insurance coverage, demonstrating our commitment to accountability and professionalism. Our policies include:

- **Professional Indemnity Insurance:** Policy Number FPII16306
- **Public and Products Liability Insurance:** Policy Number FPII16305
- **Workers Compensation Insurance:** Policy Number 247325601

These policies provide robust protection, covering all aspects of our operations and ensuring compliance with industry and legal requirements.

Compliance and Accreditations

Our commitment to excellence is underpinned by our certifications and accreditations:

- **NSW Fair Trading Design Practitioner (DEP0003831)**
Licensed to provide fire sprinkler, hydrant, and hose reel system designs.
- **NSW Fair Trading Principal Design Practitioner (PDP0001279)**
Authorised to oversee and endorse fire safety system designs.
- **FPAF Fire Safety Assessor Registry Accreditation**
Certified as a Competent Fire Safety Practitioner (Design Accreditation No. FO44120D).

Additionally, we maintain ongoing compliance with the Building Code of Australia (BCA) and other relevant regulations, ensuring all projects meet the highest standards of safety and quality.
